

SOUTH PERIMETER HIGHWAY PTH 100 AND PROPOSED ST. NORBERT BYPASS STUDY

The Manitoba government has initiated a study to develop a **functional design for PTH 100 (the South Perimeter Highway)** and identify an alignment and associated right-of-way for the future St. Norbert Bypass.

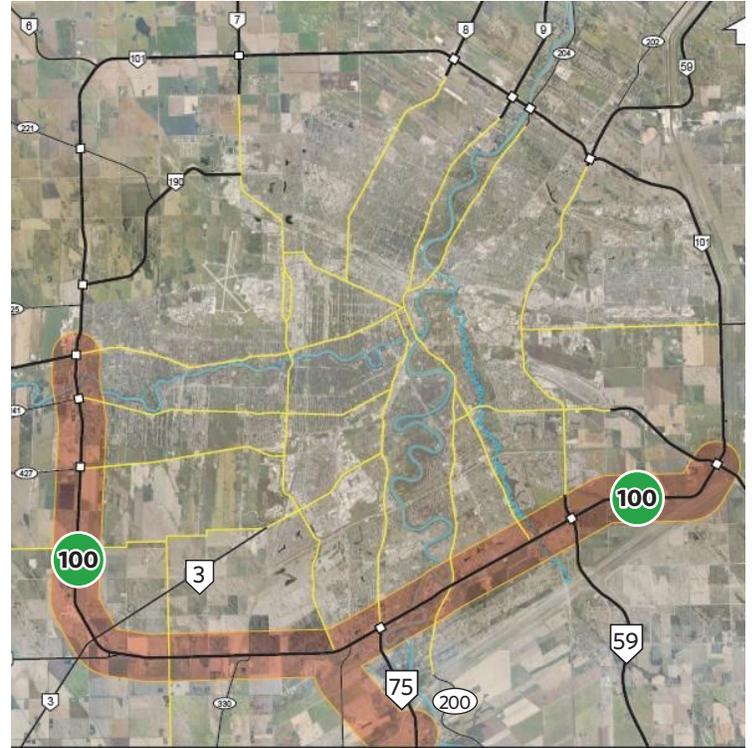

STUDY DESCRIPTION

The goal of the study is to develop a preferred functional design for **reconstructing PTH 100 to a freeway standard**, and **conceptual and preliminary designs of its associated structures**. These may include proposed interchanges, rail grade separations and waterways crossings.

The St. Norbert Bypass study component will result in a functional design for a new multi-lane divided expressway between PTH 100/Kenaston Boulevard and PTH 75 south of the community of St. Norbert.

STUDY AREA

The study area of the PTH 100 Study **extends from the north limit of PTH 1W (Portage Avenue)/PTH 100 interchange to the north limit of PTH 1E (Fermor Avenue)/PTH 100 interchange**. The proposed St. Norbert Bypass Functional Design Study extends from **PTH 100 (at Kenaston Boulevard) to PTH 75 (south of PR 247)**.
